Overall, my professor taught this course well. I love his clear, easy-to-understand, and easy-to-follow lectures. I also love how organized the class structure is, as well as the short summary of what we learned at the end of the day for people who couldn't make it to class Zoom.

A lot of work for short period of time

I enjoyed taking this course and have learned a lot. However, I am feeling overwhelmed about the percentage worth of the exams compared to the assignments and participation. Even though, in this class, we have three exams and an optional final exam to help raise our grades if we didn't do well on the other exams. Still, it might be helpful to decrease the percentage worth of exams for the total grade. This adjustment could better support students like me who excel in assignments, participation, and other learning components but struggle with test-taking. Doing so would provide a more balanced evaluation of a student's overall performance and understanding of the course material, ensuring that their hard work and consistent effort are somewhat reflected in their final grade.

23. Which elements of this course had the most positive impact on your engagement and/or learning?

The homework's

One element from this course that has positively impacted my learning is understanding what kind of economy I am living in right now by learning to analyze graphs and charts from data analysis and models.

The homeworks were very helpful.

The zoom meetings where the most impactful as he would make everything clear and would see challenges from our perspective.

I enjoyed the professors teaching style using personal examples to solidify the material.

24. Which elements of this course could be improved to have a more positive impact on your engagement and/or learning?

Case study

The case studies were slightly long.

I have no comment on change I truly liked my experience in this class and with the way it was taught I believe that other teachers could look at his forms of teaching and better themselves.

More required participation in class.
